

**WYOMING STATE HIGHWAY PATROL, GAME & FISH
WARDEN AND CRIMINAL INVESTIGATOR RETIREMENT
FUND**

ACTUARIAL VALUATION REPORT
FOR THE YEAR BEGINNING JANUARY 1, 2016

April 28, 2016

Board of Trustees
**Wyoming State Highway Patrol, Game & Fish Warden and Criminal Investigator
Retirement Fund**
6101 Yellowstone Road
Suite 500
Cheyenne, WY 82002

Dear Board of Trustees:

Subject: Actuarial Valuation as of January 1, 2016

We are pleased to present the report of the actuarial valuation of the Wyoming State Highway Patrol, Game & Fish Warden and Criminal Investigator Retirement Fund (“the Fund”) for the plan year commencing January 1, 2016. This report describes the current actuarial condition of the Fund, determines the calculated employer contribution rate (the actuarially determined contribution rate), and analyzes changes in this contribution rate. Valuations are prepared annually, as of January 1, the first day of the Fund’s plan year.

Financing objectives and funding policy

The employer and employee contribution rates are specified in statute. The purpose of this actuarial valuation is to determine whether or not this statutory contribution is sufficient to meet the obligations of the Fund.

Progress toward realization of financing objectives

The funded ratio (the ratio of the actuarial value of assets to the actuarial accrued liability) is a standard measure of a plan’s funded status. The funded ratio, based upon the assumption of no further cost-of-living adjustment increases, as of January 1, 2016 is 78.16%. As of January 1, 2015, this funded ratio, based on the assumption of no future COLAs and the actuarial value of assets, was 79.18%. On a market value of assets basis, the funded ratio decreased from 79.91% as of January 1, 2015 to 73.76% as of January 1, 2016.

Benefit provisions

The benefit provisions reflected in this valuation are those which were in effect on January 1, 2016. W.S. 9-3-454 prohibits benefit changes, including cost-of-living increases, unless the funded ratio stays above 100% plus a margin for adverse experience throughout the life of the benefit change. Therefore, this valuation does not include any liability for future cost-of-living increases. There were no benefit changes since the prior valuation.

The benefit provisions are summarized in Appendix B of the report.

Assumptions and methods

Actuarial assumptions and methods are set by the Board, based upon recommendations made by the plan's actuary. The current assumptions used in the actuarial valuation were adopted by the Board effective February 22, 2013 and were first utilized with the January 1, 2014 valuation report. For a detailed description of the experience related to these assumptions as well as the rationale for the changes please see our latest Wyoming Retirement System Actuarial Experience Study Report. Our experience study report was dated February 21, 2013 and it covered the five-year investigation period ending December 31, 2011.

The results of the actuarial valuation are dependent upon the actuarial assumptions used. Actual results can and almost certainly will differ, as actual experience deviates from the assumptions. Even seemingly minor changes in the assumptions can materially change the liabilities, calculated contribution rates and funding periods. The actuarial calculations presented in the report are intended to provide information for rational decision making.

The 14.88% employer contribution and the 14.56% employee contribution are the rates that comply with State law. Due to the many factors affecting a retirement system, users of this report should be aware that contributions made at that rate do not necessarily guarantee long-term benefit security.

The employer contribution requirement in Table 1 of this report is determined using the actuarial assumptions and methods disclosed in Appendix A of this report. This report does not include a detailed assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment. We encourage a review and assessment of investment and other significant risks that may have a material effect on the plan's financial condition.

All assumptions and methods are described in Appendix A of the report.

Data

Member data for retired, active and inactive members was supplied as of January 1, 2016 by the Fund's staff. We did not audit this data, but we did apply a number of tests to the data, and we concluded that it was reasonable and consistent with the prior year's data.

Asset and financial information as of January 1, 2016 was prepared by Wyoming Retirement System and is the responsibility of management. Eide Bailly, LLP provided us the asset and financial information and will opine on Wyoming Retirement System's statements.

Plan experience

As part of each valuation, we examine the Fund's experience relative to the assumptions. Experience in a given year will deviate from the assumptions and a gain occurs if the liabilities grow slower than the assumption set anticipates, and a loss occurs if the liabilities grow faster. This past fiscal year the Fund had a total experience loss of approximately \$2.7 million primarily due to asset and contribution experience. The aggregate results of these analyses are disclosed in Tables 4 and 5 under Section III of the report.

Actuarial certification

All of the tables contained in this actuarial valuation report were prepared by Gabriel, Roeder, Smith & Company. Historical information for years prior to 2010 was prepared by the prior actuarial firm and was not subjected to our actuarial review. We certify that the information presented herein is accurate and fairly portrays the actuarial position of the Fund as of January 1, 2016.

All of our work conforms with generally accepted actuarial principles and practices, and with the Actuarial Standards of Practice issued by the Actuarial Standards Board. In our opinion, our calculations also comply with the requirements of state law and, where applicable, the Internal Revenue Code and ERISA. The undersigned are independent actuaries and consultants. Mark Randall and Leslie Thompson are Enrolled Actuaries and Mark Randall, Leslie Thompson, and Paul Wood are Members of the American Academy of Actuaries, and all three meet all the Qualification Standards of the American Academy of Actuaries.

Finally, all of the undersigned are experienced in performing valuations for large public retirement systems.

Respectfully submitted,

Gabriel, Roeder, Smith & Company

Mark R. Randall, FCA, EA, MAAA
Chief Executive Officer

Leslie Thompson, FSA, FCA, EA, MAAA
Senior Consultant

Paul T. Wood, ASA, FCA, MAAA
Consultant

EXECUTIVE SUMMARY

Executive Summary

Item	January 1, 2016	January 1, 2015
	No COLA	No COLA
1. Contributions:		
a. Total normal cost	23.19%	23.20%
b. Employee contributions	(14.56%)	(14.56%)
c. Other expected contributions*	(0.27%)	(0.31%)
d. Net employer normal cost	8.36%	8.33%
e. Amortization payment	7.82%	7.54%
f. Administrative expenses	0.45%	0.49%
g. Required contribution	16.63%	16.36%
h. Statutory*	(14.88%)	(13.86%)
i. Shortfall/(surplus)**	1.75%	2.50%
2. Funding Elements:		
a. Market value of assets (MVA)	\$121,352,880	\$124,821,143
b. Actuarial value of assets (AVA)	\$128,597,582	\$123,680,718
c. Actuarial accrued liability (AAL)	\$164,522,386	\$156,201,302
d. Unfunded/(overfunded) actuarial accrued liability (UAAL)	\$35,924,804	\$32,520,584
3. Contributions and Ratios:		
a. Annual required contribution	\$4,097,473	\$3,784,380
b. Actual contributions	N/A	3,355,688
i. Employer	N/A	3,289,373
ii. Other	N/A	66,315
c. Percentage contributed	N/A	88.67%
d. Funded ratio on an actuarial basis (AVA/AAL)	78.16%	79.18%
e. Funded ratio on a market basis (MVA/AAL)	73.76%	79.91%
f. Projected payroll	\$24,641,033	\$23,140,300

* As of January 1, 2016, \$66,315 (\$71,238 as of January 1, 2015) comes from a contribution expected from Highway Patrol or Game & Fish Commission funds for the current year to fund the past cost-of-living improvements to retired members paid under Section 9-3-610(b).

SECTION II

DISCUSSION

Contribution Requirements

- Exhibits throughout this report are based primarily, unless stated otherwise, on the assumption of no future cost-of-living adjustments (COLAs).
- W.S. 9-3-454 prohibits benefit changes, including cost-of-living increases, unless the funded ratio stays above 100% plus a margin for adverse experience throughout the life of the benefit change. The actuarial value funded ratio is 78.16% and the market value funded ratio is 73.76%.
- There were no changes to the benefit provisions since the prior valuation.
- There were no changes in the actuarial assumptions or methods since the prior valuation.
- The amortization payment is based upon the following assumptions:
 - 30-year open funding period
 - Amortization payment amounts are calculated in such a way that they will increase as a level percentage of payroll
 - Total payroll increases are assumed at 4.25% per year
 - Future growth in the number of active members is not reflected in the annual valuation
- Analysis of the change in contribution rates is shown in Table 5 under Section III of the report.
- The calculated funding period assuming the current statutory contribution of 14.88% of pay is 51 years.

Calculation of Contribution Rates

The funds available to pay benefits come from two sources, contributions and investment income on those contributions (the majority of the funds available to pay benefits typically come from investment income). The Fund receives contributions from two sources, employer contributions and member contributions which are specified in statute and determined as a percentage of pay. As shown in Table 1 under Section III of the report, the calculated employer contribution rate has three components:

- The normal cost percentage (NC%)
- The amortization percentage (UAAL%)
- The administrative expenses

The NC% is the theoretical amount which would be required to pay the members' benefits if this amount had been contributed from each member's entry date and if the fund's experience exactly followed the actuarial assumptions. The NC% is shown in Table 3 under Section III of the report.

The actuarial accrued liability (AAL) is the difference between (i) the actuarial present value of all future benefits for all current participants of the fund, including active, inactive and retired members, and (ii) the actuarial present value of future normal costs. Thus the AAL represents the liability associated with past years. The unfunded actuarial accrued liability (UAAL) is the difference between the AAL and the actuarial value of assets (AVA). It is the shortfall/excess between the liability associated with prior years (the AAL) and the assets actually accumulated (the AVA). This shortfall/excess can arise from several sources, including actuarial gains and losses which are caused by differences between actual experience and the plan's assumptions, changes to the plan's actuarial assumptions, and amendments to the benefit provisions.

The UAAL% is the amount required to fund this difference. It is the amount, expressed as a level percentage of payroll, necessary to amortize the UAAL. This amortization is over a period of 30 years. The Executive Summary shows the UAAL%, called Amortization Payment, compared to that of last year.

Administrative expenses are the average of the actual expenses for the prior two years, with each year projected at 6.50% to the valuation date.

The calculated rate of 16.63% is used in determining the contributions necessary to meet the Actuarially Determined Contribution for the twelve-month period beginning January 1, 2016. The employer contribution is 14.88% as of July 1, 2015. Therefore, a contribution shortfall (when comparing the statutory contributions against the Actuarially Determined Contribution) of 1.75% exists. This is detailed in the Executive Summary.

Financial Data and Experience

As of January 1, 2016, the Fund has a total market value of approximately \$121 million. Financial information was received from Eide Bailly, LLP.

Table 7 under Section III of the report shows a reconciliation of the market values between the beginning and end of 2015.

During 2015, the total investment return on the market value of assets (MVA), as reported by NEPC, LLC, was (0.26%), as shown in Table 10 under Section III of the report.

In determining the contribution rates and funded status of the Fund, an actuarial value of assets (AVA) is used rather than the market value of assets. The actuarial value of assets is based on the market value of assets with a five-year phase-in of actual investment return in excess of (or less than) expected investment income. Expected investment income is determined using the assumed investment return rate and the market value of assets (adjusted for receipts and disbursements during the year). The returns are computed net of administrative and investment expenses. An adjustment is made if the actuarial value is not within 20% of the Market Value. For any year following a year in which the 20% of market value adjustment was applied, the actuarial value is determined as if the adjustment was not applied in the previous year.

The development of the AVA is shown in Table 9 under Section III of the report. The AVA is \$129 million. The AVA is 105.97% of the MVA, compared to 99.09% last year. The difference between the AVA and the MVA is the deferred gains and losses. As of January 1, 2015, the total deferred gain was \$1.1 million. As of January 1, 2016, the total deferred loss was \$ 7.2 million.

In addition to the market return, Table 10 also shows the return on the actuarial value of assets for the Fund. For 2015, this return was 5.86%. Because this is less than the assumed 7.75% investment return, an actuarial loss occurred increasing the unfunded actuarial accrued liabilities of the Fund by \$2.1 million.

Member Data

Member data as of January 1, 2016, was supplied electronically by the Fund's staff. While we did not audit this data, we did perform various tests to ensure that it was internally consistent, consistent with the prior year's data, and was reasonable overall.

Table 15 under Section III of the report shows the number of members by category (active, inactive, retired, etc.) along with member statistics. Tables 16 through 28 show summaries of certain historical data and include membership statistics.

Total active member payroll increased 6.49% last year, compared with a 1.74% increase the prior year.

There were thirteen new retirements this year with an average final average salary at retirement of \$83,862.

Of the 317 active participants, 65 are eligible or will become eligible for retirement in 2016.

Variation in the growth of payroll is significant because the methodology used in the valuation to amortize the unfunded actuarial accrued liability assumes a growing payroll into the future. Our current assumption is a 4.25% annual growth rate. If the payroll does not grow at the assumed 4.25% per year average, then the current amortization payments may be understated and the funding position of the Fund will not strengthen as assumed over time. Higher than expected payroll growth, however, has the opposite effect of this and the funded position of the Fund should trend towards 100%. Table 5 under Section III of the report shows, for the past year, payroll for the plan increased more than expected, so the effect is a decrease in the calculated contribution rate of 0.17% of payroll.

The increase in total payroll is mainly attributable to the growth in the active population from 304 to 317. Payroll for continuing active participants increased less than expected.

Benefit Provisions

Appendix B of our Report includes a more detailed summary of the benefit provisions for the Fund. A brief summary is as follows:

- *Normal Retirement Eligibility*
 - Age 50 with at least six years of service
- *Normal Retirement Benefit*
 - 2.50% of final average salary not to exceed 75.0% of final average salary
- *Normal Form of Payment* is a 50% Joint & Survivor Annuity for married retirees and Life Annuity for unmarried retirees
- *Employee Contributions* are required
 - 14.56% of payroll as of July 1, 2014
- *Post-retirement Cost-of-Living Adjustments (COLAs)*
 - W.S. 9-3-454 prohibits benefit changes, including cost-of-living increases, unless the funded ratio stays above 100% plus a margin for adverse experience throughout the life of the benefit change.

There have been no changes to plan provisions since the prior valuation.

Actuarial Methods and Assumptions

Appendix A of the report includes a summary of the actuarial assumptions and methods used in this valuation. A few highlights are listed as follows:

- Costs are determined using the Entry Age Normal actuarial cost method, calculated as a level percentage of payroll.
- The unfunded actuarial accrued liability is amortized over an open 30 year period as a level percent of payroll.
- The assumed annual investment return rate is 7.75%, with assumed inflation of 3.25%.
- Payroll is assumed to increase at 4.25% per year.
- Inactive vested participants are assumed to retire at age 50 or the valuation date if over age 50.
- No benefit data is available for members entitled to deferred benefits. The present value of benefits expected to be paid to vested inactive non-retired members is approximated using the data provided.

The average future lifetime for current pensioners is 18.6 years.

There have been no changes to actuarial assumptions or methods since the prior valuation.

GASB and Funding Progress

Governmental Accounting Standards Board Statement Number 67 (GASB 67) contains certain accounting requirements for the Fund. Schedules, notes and required supplementary information are provided under separate cover.

SECTION III

SUPPORTING EXHIBITS

Calculation of Annual Required Contribution Rate
(Assumes No Future Cost-Of-Living Increases)

Item	January 1, 2016	January 1, 2015
1. Projected valuation payroll	\$24,641,033	\$23,140,300
2. Present value of future pay	\$247,063,928	\$224,039,137
3. Employer normal cost rate	8.36%	8.33%
4. Actuarial accrued liability for active members		
a. Present value of future benefits for active members	\$119,814,555	\$114,141,575
b. Less: present value of future employer normal costs	(20,314,151)	(18,380,318)
c. Less: present value of future employee contributions	(35,972,510)	(32,620,098)
d. Actuarial accrued liability	\$63,527,894	\$63,141,159
5. Total actuarial accrued liability for:		
a. Retirees and beneficiaries	\$84,765,833	\$79,432,877
b. Disabled members	11,078,205	10,476,426
c. Inactive members	5,150,454	3,150,839
d. Active members (Item 4d)	63,527,894	63,141,159
e. Total	\$164,522,386	\$156,201,302
6. Actuarial value of assets (Table 9)	\$128,597,582	\$123,680,718
7. Unfunded actuarial accrued liability (UAAL) (Item 5e - Item 6)	\$35,924,804	\$32,520,584
8. Funding period	30 years	30 years
9. Assumed payroll growth rate	4.25%	4.25%
10. Employer contribution requirement		
a. UAAL amortization payment as % of pay	7.82%	7.54%
b. Employer normal cost	8.36%	8.33%
c. Administrative expense	0.45%	0.49%
d. Contribution requirement (a + b + c)	16.63%	16.36%

Cost Breakdown
(Assumes No Future Cost-Of-Living Increases)

Item	Present Value of Future Normal Costs (1)	Actuarial Accrued Liabilities (2)	Total Present Value of Benefits (3) = (1) + (2)
Age and service allowances based on total service and disability benefits likely to be rendered by present active members	\$45,329,731	\$61,880,698	\$107,210,429
Death-in-service benefits likely to be paid on behalf of present active members (employer financed portion)	1,233,083	613,471	1,846,554
Separation benefits (refunds of contributions and deferred allowances) likely to be paid to present active members	9,723,847	1,033,725	10,757,572
Benefits likely to be paid to vested inactive members	0	4,684,203	4,684,203
Benefits to be paid to members due refunds	0	466,251	466,251
Benefits to be paid to current retirees, disabled members, beneficiaries, and future beneficiaries of current retirees	0	95,844,038	95,844,038
Total	\$56,286,661	\$164,522,386	\$220,809,047
Actuarial value of assets	0	128,597,582	128,597,582
Liabilities to be covered by future contributions	\$56,286,661	\$35,924,804	\$92,211,465

History of Total Normal Cost
(Assumes No Future Cost-Of-Living Increases)

<u>Fiscal Year Ending December 31</u>	<u>Normal Cost (as Percent of Payroll)</u>
(1)	(2)
2007	17.45%
2008	16.93%
2009	18.92%
2010	19.57%
2011	19.63%
2012	19.59%
2013	19.67%
2014	23.20%
2015	23.20%
2016	23.19%

Calculation of Total Actuarial Gain/(Loss)
(Assumes No Future Cost-Of-Living Increases)

Item	January 1, 2016
1. Derivation of experience gain/(loss)	
a. Unfunded actuarial accrued liability (UAAL) - previous valuation	\$32,520,584
b. Normal cost (NC) for fiscal year ending December 31, 2015	5,368,348
c. Actual administrative expenses for fiscal year ending December 31, 2015	101,768
d. Actuarially determined contribution for fiscal year ending December 31, 2015	7,225,343
e. Interest accrual:	
(i) For whole year on (a)	2,520,345
(ii) For half year on (b) + (c) - (d)	(68,015)
(iii) Total interest: (e)(i) + (e)(ii)	2,452,330
f. Change in UAAL due to plan changes	-
g. Change in UAAL due to assumption change	-
h. Expected UAAL current year: (a) + (b) + (c) - (d) + (e)(iii) + (f) + (g)	33,217,687
i. Actual UAAL current year	35,924,804
j. Experience gain/(loss): (h) - (i)	(2,707,117)
k. Experience gain/(loss) as a % of actuarial accrued liability	-1.65%
2. Approximate portion of gain/(loss) due to investments (at actuarial value)	(\$2,111,222)
3. Approximate portion of gain/(loss) due to contributions higher or lower than expected	(\$559,218)
4. Approximate portion of gain/(loss) due to liabilities: (1)(j) - (2) - (3)	(\$36,677)
a. Age & service retirements	(511,461)
b. Disability retirements	(184,355)
c. Death-in-service	56,826
d. Withdrawal from employment	(280,937)
e. Rehires	18,968
f. Pay increases less than expected	1,395,507
g. Death after retirement	68,775
h. Other	(600,000)
i. Other as a % of actuarial accrued liability	-0.36%

Change in Calculated Contribution Rate Since the Prior Valuation
(Assumes No Future Cost-Of-Living Increases)

Item	January 1, 2016
1. Calculated contribution rate as of January 1, 2015	16.36%
2. Change in contribution rate during year	
a. Change in employer normal cost	0.03%
b. Assumption changes	0.00%
c. Recognition of prior asset losses (gains)	0.06%
d. Actuarial (gain) loss from current year asset performance	0.49%
e. Actuarial (gain) loss from liability sources and administrative expenses	-0.10%
f. Difference between contributions made and required contributions	0.12%
g. Effect of payroll growing (faster)/slower than assumption	-0.17%
h. Open amortization period reset to 30 years	-0.16%
i. Other changes	0.00%
j. Total change	0.27%
3. Calculated contribution rate as of January 1, 2016	16.63%

Statement of Plan Net Assets

Assets at Market Value		
Item	FYE 2015	FYE 2014
1. Cash and cash equivalents (operating cash)	\$8,494,170	\$7,552,806
2. Receivables		
a. Employee contributions	\$295,364	\$275,995
b. Employer contributions	301,582	262,736
c. Securities sold	0	67,553
d. Accrued interest and dividends	235,838	324,228
e. Currency contract receivable	54,690,776	18,340,255
f. Other	593,412	0
g. Rebate and fee income receivable	0	0
h. Total receivables	\$56,116,972	\$19,270,767
3. Investments, at fair value	\$118,783,109	\$127,797,397
4. Liabilities		
a. Benefits and refunds payable	\$0	\$0
b. Accrued payroll taxes and deductions	0	0
c. Securities purchased	(999,389)	(1,133,442)
d. Administrative and consulting fees payable	(219,208)	(217,572)
e. Currency contract payable	(54,584,278)	(17,929,072)
f. Securities lending collateral	(6,238,496)	(10,519,741)
g. Total liabilities	(\$62,041,371)	(\$29,799,827)
5. Total market value of assets available for benefits	\$121,352,880	\$124,821,143

Reconciliation of Plan Net Assets

Assets at Market Value		
Item	FYE 2015	FYE 2014
A. Market value of assets at beginning of year	\$124,821,143	\$121,363,344
B. Contribution income:		
1. Contributions		
a. Employee	\$3,331,298	\$3,150,559
b. Employer	3,289,373	3,006,277
c. Other*	259,303	230,988
d. Total	\$6,879,974	\$6,387,824
2. Investment income		
a. Interest, dividends, and other income	\$2,873,364	\$3,033,799
b. Net appreciation	(3,379,171)	3,595,531
c. Investment expenses	(730,922)	(792,101)
d. Net investment income	(\$1,236,729)	\$5,837,229
3. Securities lending		
a. Gross income	\$43,493	\$74,667
b. Deductions	(6,239)	(11,188)
c. Net investment income	\$37,254	\$63,479
4. Benefits and refunds		
a. Refunds	(\$120,906)	(\$368,093)
b. Regular monthly benefits	(8,926,088)	(8,364,762)
c. Total	(\$9,046,994)	(\$8,732,855)
5. Administrative and miscellaneous expenses	(\$101,768)	(\$97,878)
C. Market value of assets at end of year	\$121,352,880	\$124,821,143

* Includes contributions expected from Highway Patrol or Game & Fish Commission funds for the current year to fund the past cost-of-living improvements to retired members paid under Section 9-3-610(b). The remaining contributions come from member service purchases (\$159,750 for FYE 2014, \$192,988 for FYE 2015).

* Employer contributions include other funding sources and employee contributions may include member redeposits and member service purchase contributions

** Net of investment expenses

Development of Actuarial Value of Assets

Item	FYE 2015	FYE 2014
1. Actuarial value of assets, beginning of year (before corridor)	\$123,680,718	\$116,151,164
2. Market value, end of year	\$121,352,880	\$124,821,143
3. Market value, beginning of year	\$124,821,143	\$121,363,344
4. Non-investment/administrative net cash flow:		
a. Employee contributions	\$3,331,298	\$3,150,559
b. Employer contributions	3,289,373	3,006,277
c. Other contributions	259,303	230,988
d. Refund of employee accounts	(120,906)	(368,093)
e. Retirement benefits	(8,926,088)	(8,364,762)
f. Administrative Expenses	(101,768)	(97,878)
g. Total net cash flow: [sum of (4a) through (4f)]	(\$2,268,788)	(\$2,442,909)
5. Investments and securities lending:		
a. Interest and dividends on investments	\$2,873,364	\$3,033,799
b. Gross income from securities lending	43,493	74,667
c. Fees and expenses	(737,161)	(803,289)
d. Total net income: [sum of (5a) through (5c)]	\$2,179,696	\$2,305,177
6. Investment income:		
a. Actual market return: (2) - (3) - (4g) - (5d)	(\$3,379,171)	\$3,595,531
b. Assumed rate of return	7.75%	7.75%
c. Assumed amount of return	7,407,667	7,007,586
d. Amount subject to phase-in: (6a) - (6c)	(\$10,786,838)	(\$3,412,055)
7. Phase-in recognition of investment income:		
a. Current year: 0.20 * (6d)	(\$2,157,368)	(\$682,411)
b. First prior year	(682,411)	1,161,650
c. Second prior year	1,161,650	1,108,703
d. Third prior year	1,108,703	(1,832,285)
e. Fourth prior year	(1,832,285)	904,043
f. Total recognition	(\$2,401,711)	\$659,700
8. Actuarial value of assets, end of year		
a. Preliminary actuarial value of assets, end of year: (1) + (4g) + (5d) + (6c) + (7f)	\$128,597,582	\$123,680,718
b. Upper corridor limit: 120% * (2)	\$145,623,456	\$149,785,372
c. Lower corridor limit: 80% * (2)	\$97,082,304	\$99,856,914
d. Actuarial value of assets, end of year	\$128,597,582	\$123,680,718
9. Difference between market and actuarial value of assets	(\$7,244,702)	\$1,140,425
10. Actuarial rate of return	5.86%	8.68%
11. Market rate of return*	-0.26%	4.70%
12. Ratio of actuarial value to market value of assets	105.97%	99.09%

* Current year market rate of return is based on unaudited data and is supplied by NEPC, LLC.

History of Investment Returns

Plan Year (1)	Market Value (2)	Actuarial Value (3)
2000	-0.99%	16.23%
2001	-4.47%	10.43%
2002	-9.29%	-1.37%
2003	21.00%	8.51%
2004	11.54%	2.96%
2005	8.22%	5.29%
2006	12.63%	8.61%
2007	7.44%	11.37%

2045	25,812,855	4,179,544	29,992,399

* Includes Disabled Members, Beneficiaries, and Deferred Vested Members. Retirement benefit payments for deferred vested members are assumed to commence at age 50.

APPENDIX A

SUMMARY OF ACTUARIAL ASSUMPTIONS AND METHODS

Summary of Actuarial Assumptions and Methods

The following methods and assumptions were used in preparing the January 1, 2016 actuarial valuation report.

1. Valuation Date

The valuation date for any given year is January 1st, the first day of each plan year. This is the date as of which the actuarial present value of future benefits and the actuarial value of assets are determined.

2. Actuarial Cost Method

The actuarial valuation uses the Entry Age Normal (EAN) actuarial cost method, amortized as a level percentage of payroll. Under this method, the employer contribution rate is the sum of (i) the employer normal cost rate, and (ii) the rate that will amortize the unfunded actuarial accrued liability (UAAL).

- a. The valuation is prepared on the projected benefit basis, under which the present value, at the investment return rate assumed to be earned in the future (currently 7.75%), of each participant's expected benefit payable at retirement or death is determined, based on his/her age, service, sex and compensation. The calculations take into account the probability of a participant's death or termination of employment prior to becoming eligible for a benefit, as well as the possibility of his/her terminating with a service, disability, or survivor's benefit. Future salary increases are also anticipated. The present value of the expected benefits payable for the active participants is added to the present value of the expected future payments to retired participants and beneficiaries to obtain the present value of all expected benefits payable from the Fund on account of the present group of participants and beneficiaries.
- b. The employer contributions required to support the benefits of the Fund are determined using a level funding approach, and consist of a normal cost contribution and a unfunded accrued liability contribution.
- c. The normal cost contribution is determined using the "entry age normal" actuarial cost method. Under this method, a calculation is made to determine the average uniform and constant percentage rate of employer contribution which, if applied to the compensation of each new participant during the entire period of his/her anticipated covered service, would be required to meet the cost of all benefits payable on his/her behalf based on the benefits provisions applicable for the individual member.

- d. The unfunded actuarial accrued liability contributions are determined by subtracting the actuarial value of assets from the actuarial accrued liability and amortizing the result over 30 years from the valuation date.

3. Actuarial Value of Assets

The actuarial value of assets is based on the market value of assets with a five-year phase-in of actual investment return in excess of (less than) expected investment income, with interest, dividends, and other income recognized immediately. Expected investment income is determined using the assumed investment return rate and the market value of assets (adjusted for receipts and disbursements during the year). The returns are computed net of administrative and investment expenses. An adjustment is made if the actuarial value is not within 20% of the Market Value. For any year following a year in which the 20% of market value adjustment was applied, the actuarial value is determined as if the adjustment was not applied in the previous year.

4. Economic Assumptions

a. Investment return

7.75% per year, compounded annually, composed of an assumed 3.25% inflation rate and a 4.50% net real rate of return. This rate represents the assumed return, net of investment expenses.

b. Salary increase rate

Age	Rate
20	8.00%
25	8.00%
30	8.00%
35	8.00%
40	7.50%
45	7.25%
50	7.00%
55	5.00%
60	4.75%

c. Payroll growth rate

In the amortization of the unfunded actuarial accrued liability, payroll is assumed to increase 4.25% per year. This increase rate is solely due to the effect of inflation on salaries, with no allowance for future membership growth.

d. Cost-of-Living adjustment

No cost-of-living adjustment is assumed since the policy for providing the benefit requires Board approval to make the recommendation to the Joint Appropriations Committee and the funded level of the plan shows a cost-of-living requirement would not be permitted.

5. Demographic Assumptions

a. Rates Before Retirement

Healthy Pre-Retirement Mortality:

RP-2000 Combined Mortality Table, fully generational, projected with Scale BB

Males: Set back 4 years with a multiplier of 104%

Females: Set back 3 years with a multiplier of 90%

Healthy Post-Retirement Mortality:

RP-2000 Combined Mortality Table, fully generational, projected with Scale BB

Males: No set back with a multiplier of 104%

Females: Set forward 1 year with a multiplier of 90%

Disabled Mortality:

RP-2000 Disabled Mortality Table, fully generational, projected with Scale BB

Males: Set forward 5 years with a multiplier of 120%

Females: Set forward 5 years with a multiplier of 120%

Age	Pre-Retirement		Post-Retirement		Disabled	
	Projected to 2016 using Scale BB					
	Male	Female	Male	Female	Male	Female
20	0.03%	0.02%	0.03%	0.02%	2.58%	0.85%
25	0.04%	0.02%	0.04%	0.02%	2.58%	0.85%
30	0.04%	0.02%	0.04%	0.03%	2.58%	0.85%
35	0.05%	0.03%	0.08%	0.04%	2.58%	0.85%
40	0.08%	0.05%	0.11%	0.07%	2.58%	0.85%
45	0.11%	0.07%	0.15%	0.10%	3.31%	1.32%
50	0.16%	0.11%	0.21%	0.16%	4.05%	1.83%
55	0.24%	0.17%	0.36%	0.25%	4.51%	2.23%
60	0.42%	0.28%	0.63%	0.44%	4.96%	2.77%
65	0.70%	0.49%	1.09%	0.81%	5.90%	3.72%
70	1.22%	0.90%	1.81%	1.38%	7.73%	5.17%
75			3.09%	2.30%	10.31%	7.15%
80			5.26%	3.77%	13.34%	9.91%
85			9.04%	6.41%	18.44%	14.08%
90			15.98%	11.08%	29.15%	21.20%
95			25.27%	17.06%	39.41%	27.16%
100			34.15%	21.34%	47.75%	35.17%

100% of active deaths are assumed to be duty-related

b. Disability and Withdrawal

Age	Disability		Withdrawal	
	Male	Female	Ultimate	
			Male	Female
20	0.10%	0.10%	11.00%	11.00%
25	0.10%	0.10%	10.00%	10.00%
30	0.23%	0.23%	5.00%	5.00%
35	0.39%	0.39%	4.00%	4.00%
40	0.57%	0.57%	3.50%	3.50%
45	0.73%	0.73%	2.50%	2.50%
50	0.75%	0.75%	2.00%	2.00%
55	0.75%	0.75%	1.00%	1.00%
60	0.75%	0.75%	0.50%	0.50%

100% of active disabilities are assumed to be duty-related

c. Retirement Rates

Age	Rate	Age	Rate
50	15%	56	10%
51	10%	57	15%
52	10%	58	20%
53	10%	59	20%
54	10%	60	40%
55	10%	61	40%
		62	100%

6. Other Assumptions

- a. Percent married: 85.00% of employees are assumed to be married. (No beneficiaries other than the spouse assumed.)
- b. Age difference: Male members are assumed to be three years older than their spouses, and female members are assumed to be three years younger than their spouses.
- c. Percent electing annuity on death (when eligible): All of the spouses of vested, married participants are assumed to elect an annuity.
- d. Percent electing deferred termination benefit: Vested terminating members are assumed to elect a refund or a deferred benefit, whichever is more valuable at the time of termination.
- e. Assumed age for commencement of deferred benefits: Members electing to receive a deferred benefit are assumed to commence receipt at the first age at which unreduced benefits are available, which for this plan is age 50.
- f. No benefit data is available for members entitled to deferred benefits. The present value of benefits expected to be paid to vested inactive non-retired members is approximated using the data provided.
- g. There will be no recoveries once disabled.
- h. Administrative expenses: Average of actual expenses for the prior two years, with each year projected at 6.50% to the valuation date.
- i. Pay increase timing: Beginning of (fiscal) year. This is equivalent to assuming that reported pay represents amount paid to members during the year ended on the valuation date.
- j. Decrement timing: Decrements of all types are assumed to occur mid-year.
- k. Eligibility testing: Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
- l. Incidence of contributions: Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in the report, and the actual payroll payable at the time contributions are made.
- m. Benefit service: All members are assumed to accrue one year of service each year.

APPENDIX B

SUMMARY OF PLAN PROVISIONS

Summary of Plan Provisions

Covered Members	<p>Any person who is employed by the Wyoming state highway patrol division as a sworn law enforcement officer;</p> <p>Any person who is commissioned as a full time law enforcement officer of the Wyoming state game and fish department;</p> <p>Any criminal investigator as defined under W.S. 9-3-602(a)(iv);</p> <p>Any person designated and appointed as capitol police under W.S. 9-1-612 and qualified pursuant to W.S. 9-1-701 through 9-1-707.</p>
Final Average Salary	Employee's average annual salary for the highest paid three continuous years of service.
Service Retirement	
Eligibility	Age 50 with six or more years of service.
Monthly Benefit	2.50% of employee's highest three-year average salary for each year of credited service, not to exceed 75.0% of final average salary.
Vesting	Any employee who has left employment with six or more years of service, and who has not withdrawn accumulated contributions, is eligible to receive the above benefit or can elect to receive a lump-sum refund of contributions with interest. An employee who terminates with less than six years of service is only eligible for the lump-sum benefit.
Duty Disability Retirement	
Eligibility	No age or service eligibility requirements. Partial or total disability resulting from an individual and specific act, the type of which would normally occur only while employed as an employee, or as otherwise defined under W.S. 9-3-611(a).
Monthly Benefit	62.5% of Final Average Salary.
Non-duty Disability Retirement	
Eligibility	10 years of credited service. Partial or total disability, but not eligible for duty disability.
Monthly Benefit	50.0% of Final Average Salary.

Pre-retirement Duty Death Benefit

Eligibility	No age or service requirements.
Monthly Benefit	50% of member's final actual salary, payable to the surviving spouse plus 5% of the member's final actual salary for each unmarried child under 18. Payment shall not exceed the member's final actual salary.

Pre-retirement Non-duty Death Benefit

Eligibility	No age or service requirements.
Monthly Benefit	2% for each year of credited service, not to exceed 50%, of the member's final actual salary payable to the surviving spouse plus 5% of the member's final actual salary for each unmarried child under 18. Payment shall not exceed 60% of the member's final actual salary.

Post-retirement Death Benefit

Monthly Benefit	50% of the benefit payable prior to the member's death plus 5% of the member's final actual salary for each unmarried child under 18. Payment shall not exceed 60% of the member's final actual salary.
-----------------	---

Contributions

Employee	14.56% of salary. The Employer may subsidize all except 1.62% of the employee contributions, which shall be paid through salary reductions.
Employer	13.86% of salary. Effective July 1, 2015, the employer contribution rate increases to 14.88% of salary.
Interest	3.00% annually effective January 1, 2016.

Cost-of-Living Improvements	W.S. 9-3-454 prohibits benefit changes, including cost-of-living increases, unless the funded ratio stays above 100% plus a margin for adverse experience throughout the life of the benefit change.
------------------------------------	--

Optional Forms of Payment

Option 1	Monthly benefit for life. Upon death, 50% of the benefit continues to be paid to the beneficiary.
Option 2	Monthly benefit for life. Upon death, 100% of the benefit continues to be paid to the beneficiary.
Option 3	Not available under this plan.
Option 4	Monthly benefit for life with a guarantee of 120 monthly payments
Option 5	The largest possible monthly benefit payable for life with no lump-sum death benefit.
